

Cotton: World Markets and Trade

April 2018

USDA Revises Australia, Brazil Residuals, Reduces Global Stocks

This month’s WASDE includes significant revisions to USDA’s loss attribute for Australia and Brazil beginning in 2010/11. The cumulative effect of these changes is equivalent to a stocks reduction of 1.25 million bales by 2017/18, which would be about 2 percent of total world stocks, however, other balance sheet changes mostly offset this adjustment. In Brazil and Australia, USDA has historically maintained significant negative losses. Losses or residuals are carried for countries when stocks estimated from the balance sheet flows do not match estimates of stocks based on direct observation or market conditions. In these cases, negative losses for past years reflected a variety of factors, including incomplete coverage of growing regions or gins, changes in moisture content, and deficiencies in data reporting from official sources, collectively believed to result in a net underestimation of production.

USDA has now determined that these statistical residuals are no longer necessary as data quality has improved for many countries around the world over the last decade, including Australia and Brazil. USDA internal local-marketing-year balance sheet calculations further suggest that these negative losses served to inflate WASDE-reported stocks relative to actual local market conditions; that is, trade patterns suggested the monthly low point in stocks was lower than the loss-inclusive balance sheet indicated. In Brazil in particular, it is observed that removing this loss estimate brings WASDE more in line with both government and industry estimates of stock-holding.

Although phasing out these residuals results in a combined downward adjustment in 2017/18 in these two countries of 1.25 million bales, year-over-year changes in stocks are little changed. Combined with higher production, Brazil’s 2017/18 ending stocks are lowered just 300,000 bales, to 8.0 million. Combined with a lower export forecast, Australia’s 2017/18 ending stocks are lowered 100,000 bales.

Overview

For 2017/18, there are only minor changes to the global balance sheet. Global production is raised due to a larger expected crop in Brazil, partially offset by a smaller crop in Sudan. Trade is up slightly.

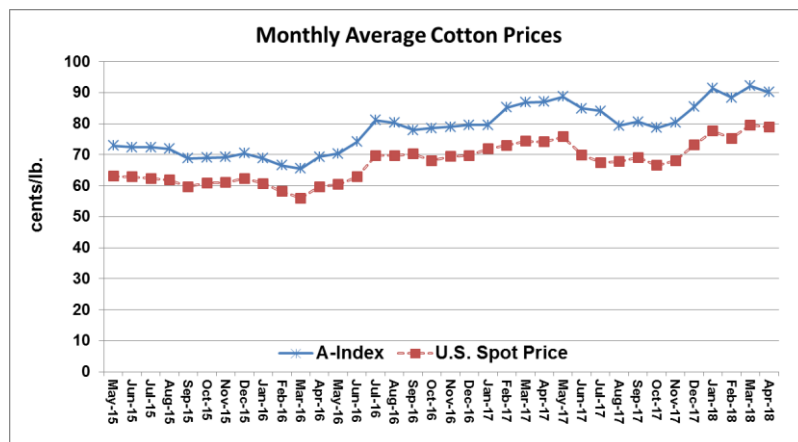

Consumption is marginally lower with world ending stocks down slightly, reflecting historical revisions which lowered beginning stocks. The U.S. balance sheet has higher exports and lower ending stocks. The U.S. season-average farm price is down 1 cent to 68 cents per pound.

For current prices received by farmers click here; [NASS farm price](#)

Prices

The A-index has maintained its level at about 90 cents, while the spot price has dipped slightly.

For more information on U.S. spot price click here; [AMS Cotton Market News](#)

2017/18 TRADE OUTLOOK

Major Importers:

000s of 480-lb statistical bales

	Change	Current	Prev	Reason
WORLD	225	39,054	38,829	
Pakistan	200	2,900	2,700	Pace of trade to date, especially recent U.S. sales and India exports
Vietnam	100	6,800	6,700	Stronger-than-expected imports during the New Year's season
Mexico	100	975	875	Strong pace of trade to date
Indonesia	-100	3,400	3,500	Weak January and February imports

Major Exporters

000s of 480-lb statistical bales

	Change	Current	Prev	Reason
WORLD	230	39,060	38,830	
India	300	4,500	4,200	Very strong recent export shipments
United States	200	15,000	14,800	High recent shipments, especially to Vietnam
Uzbekistan	100	1,200	1,100	Strong pace of trade to date
Sudan	-150	350	500	Reduced crop estimate
Australia	-200	4,200	4,400	Tighter-than-expected stocks at end of Australia's local marketing year

The Foreign Agricultural Service (FAS) updates its production, supply and distribution (PSD) database for cotton, oilseeds, and grains at 12:00 p.m. on the day the *World Agricultural Supply and Demand Estimates* (WASDE) report is released. This circular is released by 12:15 p.m.
