

Cotton: World Markets and Trade

Apparel Trade Begins to Reflect Recovery from COVID-19

Recent textile and apparel trade data¹ reveal both the global impact of COVID-19 and signs of the sector’s recovery.

Consumer demand was impacted on multiple fronts – changing behavior, lockdown restrictions, and rapid unemployment which reduced discretionary income. Global apparel imports dropped dramatically in April and May, with U.S. imports for May down 55 percent from the previous year. EU and UK imports were down over 40 percent, while Japan fell 30 percent in the same period.

The decline in textile and garment exports was felt in all major markets but not equally. Exports from Bangladesh and India fell by 85 and 90 percent respectively, while shipments from Pakistan, Turkey, and the European Union witnessed 60-percent declines. Vietnam textile and garment exports fell roughly 30 percent.

In previous economic slowdowns, such as the 2008 Great Recession, a sudden decline in consumer demand was not initially matched

¹ Chapters 61 and 62 of the HS

by slowdowns in cotton-related processing sectors (i.e. spinning, knitting, weaving, and cut-and-sew). This led to massive buildups in inventory throughout the supply chain. As consumer demand recovered, excess inventory was slowly liquidated, delaying any significant recovery.

However, the impacts of COVID-19 hit both demand and supply at the same time. Lockdown restrictions slowed consumer spending while also halting cotton-related processing. Spinning mills' operating rates in India, Pakistan, and the United States fell over 90 percent, while declines were slightly lower in China. Similar to the export data, Vietnam's operating rate declined by only 30 percent.

Vietnam Textile and Garment Exports

Recovery in the spinning sector has also been uneven – COVID-19 first impacted China and coincided with the Chinese New Year holiday. China's recovery is faster than in many other countries, with operating rates returning to near pre-COVID-19 levels in 3 to 4 months, with other countries' rates still below pre-COVID-19 levels after 6 months. While the rapid shutdown of spinning mills somewhat limited the buildup in yarn and fabric inventories, cotton stocks expanded rapidly.

U.S. Mill Use

When COVID-19 emerged, most of the 2019/20 crop was harvested and the current year's planting had begun. Expectations for 2020/21 world production have declined only slightly since February; however, global consumption is a different story. Comparing November's global consumption to the February USDA Outlook, 2019/20 use is 17 million bales lower (14 percent) and the 2020/21 forecast is 7 million bales lower (6 percent). As a result, 2020/21 global cotton ending stocks are now forecast 22 million bales higher (22 percent) than at the Outlook Forum.

The speed of recovery in consumer demand is uncertain. Recent apparel imports include deferred demand as consumers made purchases that were initially delayed. Moreover, some demand that was lost, such as school uniforms, 2020 summer and vacation clothing, hotel use of cotton bed sheets and towels, and other seasonal clothing items, may never be recovered. The long-term impacts of remote work on workplace and school attire purchases remain unknown.

Overview:

2020/21

The November forecast shows slightly higher trade, beginning stocks, and ending stocks. Use and production are marginally lower. Sharply lower production in Pakistan and Turkmenistan more than offset increases in Australia, China, and Uzbekistan. Consumption is lowered in Pakistan. Global trade is slightly higher on higher imports for Pakistan. The U.S. forecast shows marginally higher production. Yield is still projected at a record. The U.S. season-average farm price is raised 3 cents to 64 cents per pound.

Note: Historical revisions were made for Turkey reflecting new trade data that accounts for trade flows through Turkish free-trade areas.

For current prices received by farmers click here: [NASS farm price](#).

Prices

Both the A-index and U.S. spot price have continued to rise slowly as old-crop supplies tighten and Northern Hemisphere new-crop remains unavailable for shipment.

For more information on U.S. spot price click here; [AMS Cotton Market News](#)

2020/21 TRADE OUTLOOK

Major Importers:

	Previous	Current	Change	Reason
<u>WORLD</u>	42,230	42,230	605	
Pakistan	3,800	4,300	500	Sharply lower production
Turkey	4,300	4,400	100	Revised trade data

Major Exporters:

	Previous	Current	Change	Reason
<u>WORLD</u>	42,238	42,238	635	
Brazil	9,700	10,000	300	Larger carry in stocks
Australia	1,300	1,500	200	Higher production
Turkey	350	450	100	Revised trade data
