## Shortfalls in Pakistan Production, Recovering Textile Exports Drive Record 2020/21 Imports

Pakistan's 2020/21 imports are forecast at a record 5.3 million bales and are expected to exceed domestic production for the first time. Significantly lower domestic supplies have driven imports to a second consecutive record needed to support higher consumption.

Consecutive year shortfalls in domestic production have depleted supplies significantly. The 2019/20 harvest was the lowest in over 3 decades, and the 2020/21 crop is down 27 percent. Back-to-back declines have propelled imports, mostly supplied by Brazil and the United States. For more information see: [GAIN Pakistan Cotton and Products Annual](#)

Historically, India was a significant supplier to Pakistan. However, after a 2019 border closure between the two countries, Pakistan's mills have been barred from importing the world's lowest-priced cotton.

With India as the world's largest cotton yarn exporter, Pakistan's cotton importers and Yarn Merchants Association have requested that the government allow trade. On March 31, the Economic Coordination Committee of the Cabinet proposed permitting imports of cotton lint and yarn from India; however, the proposal was rejected by Pakistan's cabinet the following day.

Despite no official direct access to India's competitively priced supplies, imports are nonetheless projected at a record to support a recovering textile and garment sector. COVID-19 significantly lowered global demand for cotton yarn, fabric, and products in 2019/20. In the first 8 months of Pakistan's fiscal year (July 2020 – February 2021), the country recorded larger export values of

knitwear, bedwear, towels, and readymade garment (RMG) compared with the previous year (see chart below).<sup>1</sup>

Pakistan's stronger exports of textiles and garments are expected to support record 2020/21 cotton imports. The country's cotton supply chain is essential to its economic recovery from COVID-19; textiles and garments are not only the largest source of export revenue but also comprise 46 percent of Pakistan's manufacturing sector and 40 percent of the total labor force.<sup>2</sup>

## Overview:

### 2020/21

The April forecast shows slightly lower stocks and production. Consumption is only marginally higher, but trade is up from the previous month and projected at its highest level in 8 years. Higher consumption in Bangladesh and Mexico more than offsets a lower projection for Indonesia. Global trade is boosted by greater import demand in China and Bangladesh. Exports for Brazil, the United States, and Egypt are raised on a strong seasonal pace.

U.S. ending stocks are forecast at their lowest in 4 years at 3.9 million bales. Lower stocks are spurred by stronger exports, which are raised 0.25 million bales to 15.75 million, the highest level in 3 years. The season-average farm price is lowered 1 cent to 68 cents per pound.

## Prices

The A-index and U.S. spot price have seen a sharp decline in recent weeks as mill demand weakened when the A-Index neared \$1.00/lb, and speculators liquidated long positions in the futures market.
