

Cotton: World Markets and Trade

Vietnam: Cotton Yarn and Product Exports Drive Record 2020/21 Cotton Consumption

Robust growth in Vietnam’s cotton yarn and product exports is projected to drive 2020/21 cotton consumption to a record 7.3 million bales, 700,000 higher than the previous year’s downfall from COVID-19.

Yarn exports in 2020/21 have already exceeded the previous year’s record by more than 10 percent through the first 11 months of the marketing year. Foreign demand has been primarily driven by China, with Vietnam’s cotton yarn exports to the country accounting for roughly 60 percent of Vietnam’s total cotton lint consumption.

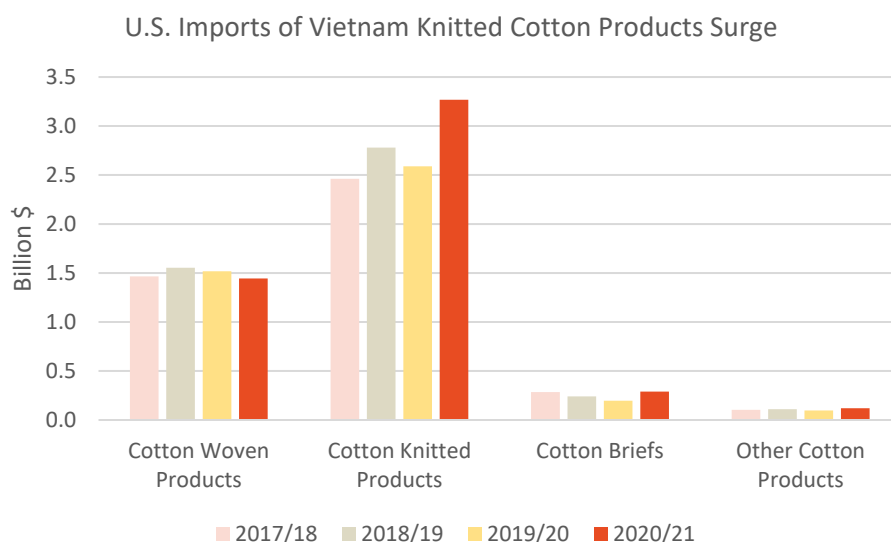

China is the world’s largest cotton yarn importer and Vietnam’s largest customer with the geographic proximity and foreign investment by Chinese companies driving record exports. China’s August to June imports of Vietnamese cotton yarn were a record (for the period) and equal to roughly 4 million bales of cotton lint consumption. China’s robust demand is expected to persist with projected growth in China’s cotton fabric and product exports, in addition to greater domestic consumption of cotton products.

The United States WRO (Withhold Release Order) on cotton lint from China’s Xinjiang region is further supporting current and future demand for Vietnam’s cotton yarn. Practically all cotton yarn spun in Vietnam is produced with cotton lint imported from outside of China. Garment and textile manufacturers in China seeking to circumvent the WRO are likely substituting imported cotton yarn for domestic with roughly two-thirds containing Xinjiang lint.

Greater domestic consumption in Vietnam of cotton yarn is also driving cotton consumption higher. Significant foreign and domestic investment in Vietnam’s garment industry has driven greater demand for cotton knitted fabrics and thus domestic consumption of cotton yarn by knitters. According to Vietnam customs data, garment and textile exports in 2020/21 are expected to recover from the previous year’s decline and rise to more than \$30 billion; the garment industry is one of the country’s largest valued source for exports.

Vietnam’s largest export market for cotton textiles and garments is the United States, which is also the world’s largest importer. U.S. imports from Vietnam were a record in the first 11 months at more than \$5 billion. Knitted cotton sweaters, pullovers, and other similar articles of clothing were the largest product category, accounting for roughly 30 percent of the total value of U.S. cotton product imports from Vietnam.

This particular category has historically been dominated by China, however, two factors have driven Vietnam’s market share of U.S. imports higher – (1) the 2020 and 2021 Withhold Release Orders (WROs) mentioned earlier; and (2) ongoing tariffs specific to China (Section 301 dispute in September 2019). Both have lowered U.S. imports of knitted cotton sweaters, pullovers, etc. from China nearly 20 percent thus far in 2020/21 (Aug. – Jun.) despite U.S. imports of this product category rising over 10 percent year-over-year during the same period.

Robust export prospects for both cotton yarn and products are expected to boost 2021/22 cotton consumption even higher to 7.6 million bales, and further support Vietnam’s rise as a major global cotton importer as well as exporter and consumer of cotton yarn and products.

2021/22 Outlook

Global production and ending stocks are lower this month. Lower crops in Brazil and the United States more than offset higher production in Australia, Mali, and Tanzania. Use is raised slightly with higher consumption growth in Bangladesh and Pakistan. Global trade is higher on larger exports for Australia and Mali which more than offset lower projections for the United States and Uzbekistan. Pakistan imports are raised for the second consecutive month to a record 5.6 million bales.

U.S. production, exports, and ending stocks are projected lower from last month. The U.S. season-average farm price is raised 5 cents to 80 cents per pound, which would be the highest since 2011/12.

For current prices received by farmers click here: [NASS farm price](#)

2020/21 Outlook

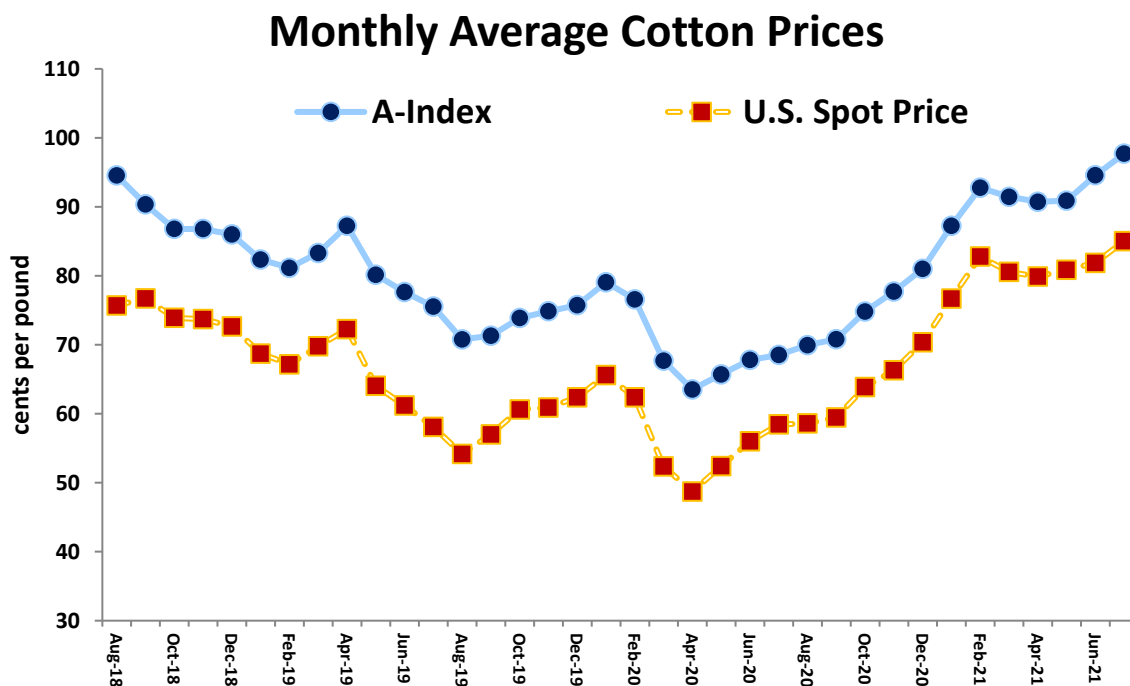

Global endings stocks are higher despite lower production and higher consumption. Global trade is raised and led by higher imports for China and Bangladesh.

The U.S. estimates are mostly unchanged. Exports are lowered only 50,000 bales to 16.35 million to reflect final USDA Export Sales data and projected July Census shipments. The 2020/21 export forecast will be adjusted next month with final July Census data; the final export estimate is the mid-point between USDA Export Sales and U.S. Census. The U.S. season-average farm price is unchanged at 66.5 cents per pound.

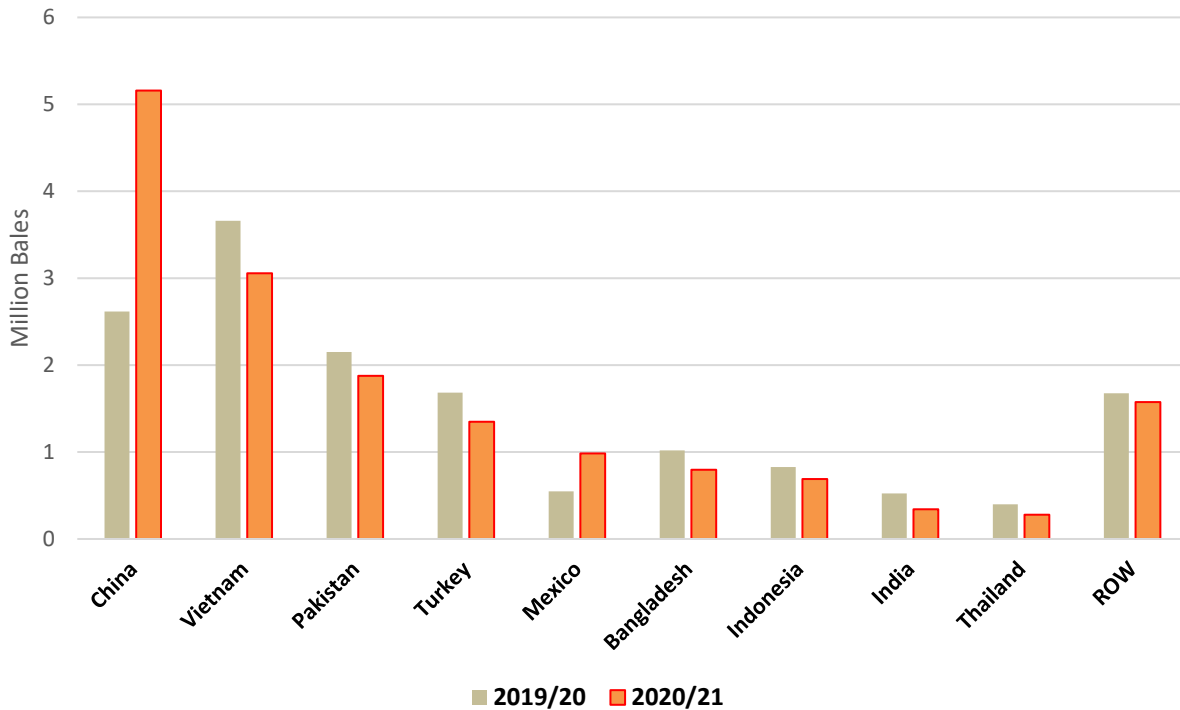

Prices

The A-index and U.S. spot price were higher for the third consecutive month in July. Greater demand in India and lower crop prospects in Brazil have strengthened the A-Index. The U.S. spot price edged higher with strong global demand for U.S. cotton, larger speculative long positions on the ICE exchange, and strong demand and rising cotton prices in India, Brazil, and China. All cotton in China put up for sale in July by China's State Reserve sold out, signifying robust demand for nearby supplies in the world's largest consuming market.
